Vicky Vishal Sahu

Senior Frontend Developer

Senior Frontend Developer with a decade of experience turning ideas into engaging web products. Currently at Purpose Green, building proptech solutions alongside designers, PMs, and engineers. Agile is my comfort zone, and there's nothing quite like seeing a product go from zero to something people actually use.

SKILLS

JavaScript · TypeScript · ReactJS · NextJS · NodeJS · Jest · Agile · Git · AWS · Vite · PNPM · Zustand · Zod · Storybook · Vercel · GraphQL · VueJS · Tailwind CSS · Webpack · CircleCI · React Native · Styled-Components · MongoDB · Angular

WORK EXPERIENCE

Senior Frontend Developer

Berlin, Germany

Purpose Green

Jul 2024 – Present

Tech Stack: React, Zustand, Zod, Storybook, Vercel, AI Agents

Achievements/Tasks

– **Development**: Built Green+ end-to-end — a proptech platform for large-scale property owners. React, Zustand, Zod, Storybook, Vercel — solid stack, deliberate choices. Shipped features across the whole product: measure configurations, payments, data rooms, PDF generation, and translation. The kind of project where you touch everything and have to get it right.

– **Architecture**: Owned the frontend architecture end-to-end — infrastructure, CI, E2E testing, monitoring, translation pipelines, and AI integration. Made calls built on ten years of knowing what scales and what quietly falls apart. Brought the same thinking to the team: clear communication, solid ways of working, and retrospectives that actually moved the needle.

– **Collaboration**: Push teammates to do their best work, cut friction wherever it hides, and keep knowledge moving across the team. Demo features to stakeholders, challenge business assumptions when it matters, and keep delivery small and frequent — because shipping often beats shipping big.

Frontend Developer

Berlin, Germany

HeyCar

Jun 2022 – May 2024

Tech Stack: NextJS, ReactJS, VueJS, TypeScript, NodeJS, Kotlin, GraphQL, Tailwind CSS, Webpack, CircleCI, AWS

Achievements/Tasks

– **Development**: Influenced the development of reusable and testable UI components that improved customer engagement on a large-scale used car platform. End-to-end involvement across frontend (NextJS, ReactJS, VueJS, TypeScript, Styled-Components) and backend (NodeJS, Kotlin).

– **Architecture**: Played a key role in designing the component architecture — modular, performant, built to scale. Significantly influenced app configuration, UI/UX patterns, and rendering strategies.

– **Codebase**: Eliminated almost 50% of technical debt through consistent refactoring and adherence to modern coding patterns, making room for new business features without friction.

– **Mentorship**: Facilitated onboarding for new engineers. Handpicked tasks aligned with juniors' career goals, reviewed PRs, gave technical feedback, and maintained comprehensive documentation.

– **Agile Collaboration**: Collaborated with PMs, designers, and backend engineers across COPs and agile ceremonies. Fostered an environment of continuous learning and knowledge sharing.

Software Developer

Heidelberg, Germany

OrgFlow · Contract

Dec 2020 – May 2022

Tech Stack: TypeScript, Angular, NodeJS, ExpressJS, React Native, MySQL, Azure, Flask, VSCode Extension

Achievements/Tasks

– Owned development of internal tools to manage org metadata for a Salesforce CRM versioning product — including a VSCode extension built with TypeScript and Angular. Played a vital role in designing and building the landing page.

– Developed robust User Management APIs integrated with MySQL. Shipped the full product in 16 months on pre-seed funding of €135k — aligning technical decisions closely with business objectives.

Contact: Daniel Rosenberg — daniel@orgflow.io

UI Engineer

Mannheim, Germany

Aliru GmbH

Oct 2019 – Nov 2020

Tech Stack: React, Redux, TypeScript, Material UI, SCSS, React Native, NodeJS, ExpressJS, MongoDB, GraphQL

Achievements/Tasks

– Built an administration platform for low-code chatbot creation from scratch — involved in full requirement gathering and architectural design.

– Engineered a flow graph with multiple node types and a logical calculator using react-diagrams, reducing the chatbot-building process by 3 steps and cutting time by ~50%.

– Integrated backend APIs with ExpressJS for data retrieval and manipulation.

Software Engineer

Bangalore, India

SM NetServ Technologies

Jan 2019 – Sep 2019

Tech Stack: ReactJS, TypeScript, NodeJS, Express, MongoDB

Achievements/Tasks

– Built a UI platform to create and manage projects for Mathematica Policy Research — previously handled entirely via raw API calls.

– Led a team of 2 interns on modern web development. Authored and supervised technical documentation for the client.

Web Developer

Bangalore, India

AppAchhi Tech

Aug 2016 – Jan 2019

Tech Stack: Vanilla JavaScript, jQuery, Bootstrap, PHP, Handlebars, Phalcon

Achievements/Tasks

– Converted wireframes to production code, collaborating closely with designers and the product team to build dynamic, interactive pages.

– Built interactive dashboards, landing pages, and sign-up forms. Also developed an interactive arcade game for product exposure.

EDUCATION

MS in Big Data & Business Applications

Oct 2019 – Sep 2021

SRH Hochschule, Heidelberg, Germany

Bachelor of Technology in Computer Science

Jul 2012 – Jun 2016

ITER, Bhubaneswar, India
